SUMMARY

Over 4.5+ Years of Experience working in the complete software testing. good knowledge of functional & non-functional testing, regression testing, GUI testing, cross-browser testing, and mobile/web testing. Proficient in different types of Manual and Automation testing methodologies. Fair knowledge of SDLC, STLC, and Bug Life Cycle. Prepare and Test with positive and negative test scenarios to ensure the system works efficiently. Interacted with developers, Business & Management Teams, and End Users.

SKILLS

- **Tools:** Appium -Mobile, Selenium WebDriver || IDE || RC, Apache JMeter, Visual Studio, GIT, Bitbucket, Postmen, Agile, TestNG.
- **Technologies:** Python, HTML, CSS, JavaScript, Java, Oops.
- **DBMS:** Mysql, MongoDB, SQL.
- **Third-Party Tools:** Git, Jira, Bugzilla, You Track, Asana, CI / CD.
- **OS:** Windows, Mac.

EXPERIENCE

TechAbbot Technology Pvt Ltd - *Jr. Quality Assurance*

March 2023 - PRESENT

- **iSellIt – Mobile App:**
 - The iSellIt App comprises six core modules: Order, Statistics, Log and Memo, Customer, Product, Sync the Database, and Reminder. The Order Module simplifies order creation, allowing users to select customers and multiple products with customization. The Product Module includes the Product List, Customer Price List, Order Pattern, and Special Products vs. Customer List for efficient product handling.
 - **Role:** Conduct various types of testing, including functional, regression, performance, and user acceptance testing. Identify, document, and

prioritize defects, issues, and inconsistencies discovered during testing. Develop and maintain automated test scripts to improve efficiency and test coverage.

- **Technology Stack:** Appium, API - Postmen, Manual & Automation Testing. Execution of prepared test cases, and bug reports.

- **IMovelt – Mobile App:**

- The app is used to do deliveries. As the orders get generated, all the information is copied to the app, and the driver will have the information immediately before he does the deliveries. As the driver makes deliveries, the customer will get a digital copy of the invoice, just to reduce the administrative paperwork at a later stage. The app gives the driver access to generate credit requisitions, which will then generate automatic notifications to the sales team with the reasons.
- **Role:** Conduct various types of testing, including functional, regression, performance, and user acceptance testing. Identify, document, and prioritize defects, issues, and inconsistencies discovered during testing. Develop and maintain automated test scripts to improve efficiency and test coverage.
- **Technology Stack:** Appium, API - Postmen, Manual & Automation Testing. Execution of prepared test cases, and bug reports.

- **Hendok Loading – Web/Mobile App:**

- Introducing the Hendok Loading App, a powerful tool designed exclusively for Hendok employees to enhance the loading process. Seamlessly scan barcodes to load items onto trucks, ensuring utmost accuracy and efficiency. With features like secure login, route visualization, and real-time order tracking, this app equips employees to optimize their workflow.
- **Role:** Conduct various types of testing, including functional, regression, performance, and user acceptance testing. Identify, document, and prioritize defects, issues, and inconsistencies discovered during testing. Develop and maintain automated test scripts to improve efficiency and test coverage.
- **Technology Stack:** Appium, API - Postmen, Manual & Automation Testing. Execution of prepared test cases, and bug reports.

- **Robberg Fine Foods – Mobile & Web App:**

- Discover the ultimate online food service shopping experience with the Grocery Express Shopping App. Shop effortlessly for a diverse range of products and categories, including seafood, chicken, spices, beef, vegetables, and more, all from the comfort of your device.
- **Role:** Conduct various types of testing, including functional, regression, performance, and user acceptance testing. Identify, document, and

prioritize defects, issues, and inconsistencies discovered during testing. Develop and maintain automated test scripts to improve efficiency and test coverage.

- **Technology Stack:** Appium, API - Postmen, Manual & Automation Testing. Execution of prepared test cases, and bug reports.

- **Grocery Express – Mobile & Web App:**

- **Easy Ordering:** Our user-friendly interface allows you to navigate and shop with ease. Browse categories, select items, and proceed to checkout at your convenience. Favorites Basket: Your previous orders are saved, creating a favorite basket for a streamlined shopping experience every time you visit. Superior Service and Delivery.
- **Role:** Conduct various types of testing, including functional, regression, performance, and user acceptance testing. Identify, document, and prioritize defects, issues, and inconsistencies discovered during testing. Develop and maintain automated test scripts to improve efficiency and test coverage.
- **Technology Stack:** Appium, API - Postmen, Manual & Automation Testing. Execution of prepared test cases, and bug reports.

ManekTech Technology - Quality Assurance

Aug 2022 - Feb 2023

- **Online Retail Platform Web App:**

- By chance, products are 100% sourced and made ethically by supporting local village people in regions of southern Africa. Their business strives to source traditional products from African communities to boost local businesses.
